Tensioned Fabric Structures

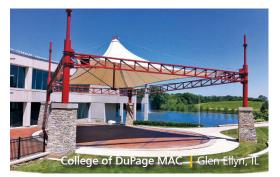

Design-Build Solutions for Tensioned Fabric Structures

For institutional facilities such as schools, universities, hospitals and government sites, tensioned fabric structures offer numerous functions such as walkway or entrance canopies, protective weather coverage, or accent features at museums, courtyard complexes or convention centers. Fabric membranes have many benefits including diffused daylighting, a lightweight flexible nature, low maintenance, long-term durability, and a variety of fabric selections for specific performance criteria.

Architects and designers create their ideas knowing the unique look of a tensile membrane structure will adapt to most client expectations. Providing nearly unlimited options with distinctive aesthetics, Tension Structures by Eide Industries can provide turn-key services for your next custom design-build project.

About Us

Proudly manufacturing in the United States since 1938, Tension Structures by Eide are fabricated in our 41,000 square foot Southern California facility. Eide Industries combines proven industry standards, technical expertise, professional turn-key services, state-of-the-art equipment, and high performance materials to manufacture customized products with uncompromising quality and engineered design-build details.

We specialize in design, manufacturing and installation of structurally complex and creatively challenging commercial, government and prototype design projects regardless of job size, scope of work or administrative demands. Eide welcomes all projects that include participation and compliance with FAR, DIR, OATELS / Apprenticeship Program, Prevailing Wage, Union Labor Agreement and any additional Project Specific requirements.
